

# GOLD OUT OF THE BOX

A Radically Different Approach To Crisis Investing,  
Including Detailed Strategies For Large & Small Investors

- ❖ *Leave the conventional investment "box", and unlock powerful methods for radically increasing wealth during a time of economic and monetary crisis*
- ❖ *Understand why gold is often a poor investment when purchased for the most common reason – as a means of profiting from Monetary Inflation*
- ❖ *Uncover gold's "hidden talent" and why precious metals may be the best investments in the world for profiting from Asset Deflation during crisis*
- ❖ *Learn the quite different investing strategy involved in using precious metals for Asset Deflation arbitrage, rather than as a Monetary Inflation hedge*
- ❖ *Study the "1/3 Strategy", a multi-component, dynamic strategy that is focused on simultaneously profiting from Monetary Inflation AND Asset Deflation while maintaining large crisis reserves for safety*
- ❖ *Follow a detailed illustration of how a small investor & homeowner can potentially substantially increase their real net worth in after-inflation and after-tax terms during a severe crisis – without buying new real estate*
- ❖ *Challenge your beliefs, face uncomfortable truths – and learn new perspectives and tools for turning gold into a once in several generation wealth creation opportunity during a time of crisis*

# GOLD OUT OF THE BOX

As my long-time readers know, there are some themes within my writing that are different from other financial writers, even within the contrarian community. Some of my “signature themes” are inflation taxes, the redistribution of wealth and simultaneous monetary inflation & asset deflation.

Monetary inflation is the destruction of the purchasing power of your money. Asset deflation is the destruction of the purchasing power of your investments. Inflation taxes represent the government taxing you on its destruction of the value of its own currency. Each of these problems represent individually devastating challenges to investors. In combination, they can cripple most investment plans.

Conventional financial planning doesn't even see the problem, let alone offer the solutions. Neither do most commentators in the contrarian financial community, who don't account for inflation taxes nor understand the historical norm for a nation in crisis – both the value of money *and* the value of investments plunge together.

The **Gold Out Of The Box 2 DVD Supplement Set** shows in step by step detail how an individual can take all three perilous challenges and turn each of them into personal opportunities. And much more. Building on the core *Turning Inflation Into Wealth Complete Video Course*, the supplemental DVDs show:

- ❖ How to reverse monetary inflation and turn the destruction of the purchasing power of your money into personal wealth.
- ❖ How to take your inflation “vision”, your ability to see how monetary inflation and asset deflation can simultaneously devastate a nation – and use that vision to unlock precious metal's “hidden talent”. What gold and silver arguably do better than any other investments in the world.
- ❖ How to use that vision, and take the most devastating investment challenge facing investors, that of the pervasive destruction of the purchasing power of investments in crisis through asset deflation, and uncover the potential once in a lifetime wealth building opportunity within massive asset deflation.
- ❖ How to reverse inflation taxes, so that instead of paying taxes on income that isn't real, taxes are avoided on cash flow that is entirely real.
- ❖ How to take government market manipulations that benefit insiders, and turn the eventual necessary collapse of those manipulations into personal wealth.
- ❖ How an individual can essentially accomplish all of the above inside of a multiple asset, multiple step plan designed not only for crisis – but for what comes after crisis.

## Disc G1 Understanding The Problems

Step by step, using easy to follow graphics and examples:

- ❖ Learn everything you need to know about inflation taxes and how they cripple conventional gold investing performance
- ❖ Follow detailed discussions of the interrelationships among inflation taxes, economic growth, financial industry fees, asset bubbles & paper wealth
- ❖ Learn the full extent of how badly the system is skewed against individual investors, why conventional investing strategies haven't been working, and how insiders in New York & Washington (and other financial & governmental centers) use the conventional investment wisdom to strip economic wealth from many millions of hard working savers, in both good & bad markets

Understand the reasons why much higher tax rates are likely within the next few years, and how this is likely to further cripple conventional gold strategies.

Learn how more than half a quadrillion dollars in derivatives create extraordinary financial peril for the world.

- ❖ Understand why the world is currently between "A Rock & A Hard Place", and how either asset deflation or monetary inflation can set off effectively unstoppable feedback loops that could rapidly destroy the current system.
- ❖ Pierce the complex jargon to understand the simple fraud at the heart of this massive market
- ❖ Learn how a meltdown could still be averted through emergency actions by people selflessly working in the national interest
- ❖ Find out what is happening in the real world of politics & finance instead
- ❖ Learn about the most likely "triggers" for setting off the feedback loops

Understand how current government interventions and manipulations create mispricings, and therefore a profit opportunity (portions of these materials are on each DVD).

- ❖ Identify debt and equity based strategies for benefiting from government market interventions, rather than being cheated by those interventions
- ❖ Learn why four different types of stocks may disproportionately benefit when government manipulations are collapsed by market forces

## Disc G2: An Intense Focus On Solutions

Learn A Seven Step, Multiyear Strategy For  
*Taking A Third & Leaving The Herd*

- ❖ The “1/3 Strategy” is a multi-component, dynamic strategy that is focused on simultaneously profiting from Monetary Inflation AND Asset Deflation (in purchasing power terms) in a tax-advantaged manner while maintaining large crisis reserves for safety
- ❖ Take a third, leave the herd, and *aggressively go for the peak Asset Deflation Arbitrage* that can potentially turn a once in several generation crisis into a multigenerational wealth creation opportunity
- ❖ Take a third, leave the herd, and set up a *Monetary Inflation Arbitrage* that may radically outperform many “conventional” inflation hedges
- ❖ Take a third, leave the herd, and set up *liquid safety reserves* that are intended to get you through a crisis of a magnitude that could devastate those following widely recommended conventional strategies
- ❖ Watch a detailed illustration of setting up an initial “1/3 Strategy” position, and follow how the components shift over a multiyear period with the different stages of a severe monetary & economic crisis
- ❖ The “1/3 Strategy” is designed to be integrated on a sliding scale basis with the core strategies from the 8 DVDs and 6 books of the Turning Inflation Into Wealth Complete Video Course. Depending on investor preferences and suitability, the integrated gold/silver component can range anywhere from almost 70% to less than 10% of net worth

For smaller investors, walk-through a simplified and more convenient strategy:

- ❖ A detailed illustration for a hypothetical 55 year old with a \$200,000 home, an \$80,000 mortgage, a \$100,000 IRA, & \$20,000 in a money market fund
- ❖ Follow all seven steps of the “1/3 Strategy” in simplified form, including the three components of Asset Deflation Arbitrage, Monetary Inflation Arbitrage, and substantial liquid reserves, shifting with the stages of the crisis
- ❖ A detailed, dollar by dollar illustration of each step on a nominal, after-tax, and then after-inflation basis, showing the sources of changes in real net worth, and how this compares to those following all-gold strategies.
- ❖ Illustrates how a more sophisticated approach can potentially powerfully outperform a gold-only inflation hedge strategy – even if gold goes to \$10,000 an ounce while maintaining current high inflation-adjusted pricing
- ❖ Potentially seek maximum Asset Deflation Arbitrage profits in tax-advantaged form from entirely inside your self-directed retirement account (not directly applicable to 401 type accounts, but key portions could be adapted)
- ❖ No need to buy additional property
